(8) Each tenderer should specify both in words and figures the amount that he is prepared to pay the Government annually for the period of the contract for the right of running the Hindu Restaurant and Hotel subject to the above conditions.

(9) The acceptance of a tender rests with the Executive Engineer, Krishnaraj Sagar Division, who does not bind himself to accept the highest or any tender or give any reason whatsoever for the rejection of any tender.

(10) Each tender shall be accompanied by a deposit of Rs. 50 in currency notes, which shall in the case of the successful tenderer be treated as earnest money for due performance of the conditions specified hereunder and in the case of unsuccessful tenderers the deposit will be returned as early as possible.

(11) The successful tenderer on intimation will be required to execute an agreement in the form prescribed within eight days giving the terms of contract and should immediately deposit a sum of Rs. 100 as security and pay the contract amount and the maintenance charges of Rs. 50 for the year, in advance; in default of his executing the bond within the time stipulated, his tender will be considered cancelled and his earnest money will be forfeited.

(12) The catering arrangements should be started immediately after the execution of the bond and should be run without any complaint from the public and as per instructions of and to the satisfaction of the Executive Engineer, Krishnaraj Sagar Division, or his representatives.

G. SESHAGIRI RAO,
Executive Engineer.

MANDYA DIVISION.

Notice dated 14th July 1938.

Sealed tenders will be received at the Office of the Executive Engineer, Mandya Division, up to 12 NOON on 3rd August 1938, for constructing a Travellers' Bungalow at Maddur.

2. Tenders in the prescribed form obtainable from the Office of the Executive Engineer, Mandya Division, should be addressed to the Executive Engineer, Mandya Division, in a sealed cover and superscribed as "Tender for Constructing a Travellers' Bungalow at Maddur." The name of the tenderer should also be superscribed on the top of the cover.

3. Each tender must be accompanied by Treasury challan for a deposit of Rupees Seven hundred (in words) Rs. 700 in cash or Government Promissory Notes or Mysore Government Bonds, duly endorsed at face value or market value, whichever is less, as earnest money. On acceptance of tender the successful tenderer will have to make a security deposit up to 10 per cent of the estimated value of the work. The earnest money of the successful tenderer will be retained as security deposit for due fulfilment of the contract. Such a deposit in cash will not carry any interest.

4. The tenders will be opened in the presence of such tenderers who wish to be present on 3rd August 1938 at Mandya. The final acceptance of the tender will rest with the Superintending Engineer, who does not bind himself to accept the lowest or any tender, or to assign any reason whatever for the rejection of any.

5. The name of the successful tenderer will be posted on the Notice Board in the Executive Engineer's Office in due course. Within eight days of the acceptance of the tender, the successful tenderer will be required to execute an agreement in the departmental Schedule Contract Form, for the due fulfilment of the contract, and for the execution of all items of work in accordance with the Bombay specifications (1931) and Mysore Public Works Department Specifications.

6. Failure to comply with the condition 5 above, or to agree to carry out the work in accordance with the specifications and agreements in force will entail forfeiture of the earnest money.

7. The earnest money of rejected tenders will be returned on submission of the receipt originally granted, along with an application to the Executive Engineer.

8. Copies of contract documents, schedules and drawings may be seen at any time at the Executive Engineer's Office, Mandya, on all working days between 11 A.M. and 5 P.M. and may be obtained from that Officer on payment of Rs. 10.

9. Specific rates should be given for each item in the schedule accompanying the tender and the rates should be in rupees, annas and pies and expressed in words and figures. Tenders offering a percentage reduction on the estimate amount will be rejected.

10. Any rates or lumpsum amounts for the items not called for, if tendered by the tenderer, will not be taken notice of. The rates for such items may be entered in a separate schedule with date and reasons for the same.

11. No alterations which are made by the tenderers in the tender form in the nomenclature of the items of work will be recognised and if corrections are made, the tenders are liable to rejection.

12. There should be no alterations or erasures in the tenders in the rates of items and any corrections made in the rates should be attested to, and the number of corrections, if any, in each page noted at the foot of the same by the tenderer.

13. No reference should be made to the Public Works Department schedule of rates.

14. In the event of the tender being submitted by a firm, it must be signed separately and severally by each member thereof, or in the event of absence of any partner, it must be signed on his behalf by a person holding power-of-attorney authorising him to do so.

15. When once the rates tendered have been accepted, they will not be revised under any circumstances. In regard to items of work not tendered, the rates for the same will be calculated by the Executive Engineer, on the basis of current rates for materials and labour with a contractor's profit of 5 per cent as may be approved by the Superintending Engineer. This shall be final and legally binding on the tenderer.

16. The quantities given in the schedule are only approximate and the drawings shown to the contractor are only tentative and are liable to alterations, omissions, deductions or additions at the discretion of the Executive Engineer or his representative. The tendered rates will hold good for any quantity, whether higher or lower than those given in the enclosed schedule.

17. The works should be completed and handed over in a tidy condition to the Public Works Department by the end of December 1938, failing which the Executive Engineer may, at his discretion, levy a penalty of Rs. 20 per day, which will ordinarily be calculated at 12 per cent per annum on the total outlay as liquidated damages for non-fulfilment of contract, and will be recovered from the contractor's outstandings for the period exceeded by him beyond the time fixed and until the work is completed and handed over.

18. In all matters of disputes of any kind not specially provided for in the agreement or of rates, penalties, measurements, quality of work, etc., the decision of the Chief or the Superintending Engineer shall be final and legally binding.

19. No claim for damages for delays caused by officers of the department in the execution of the work will be considered, whatever may be the reasons for such delays. Contractors should bear this in mind when tendering for the work. Extension of time due to delays caused by the departmental officers will, however, be considered on the merits of each case.

20. The contract should not be sublet.

21. All materials, tools and plant and machinery that will be supplied by the Executive Engineer in the interest of the work shall be accepted by the tenderer at the rates fixed by the Executive Engineer. The tenderer will pay the hire on tools and plant and machinery as per rules from the date of taking over of such machinery, tools and plant from the Stores to the date of return thereto, the dates considered being the dates of acknowledgments of the vouchers in each transaction.

22. The contractor should arrange for the payment of royalty and tolls.

Note.—(*a*) The contractor should at his own cost—

(1) Provide rods, stakes, ropes and labour required in setting out the works.

(2) Provide all necessary scaffolding, centering, labour and appliances for hoisting.

(3) Provide power and mortar mills and sheds, to keep materials under cover and also for workmen.

(4) Arrange for protecting work during inclement weather.

(5) Supply requisite temporary lights, water cisterns, water pumps and hoses, sieves, parabs, shoring, strutting and other requisite protective appliances during the progress of the work.

(6) Providing his own machinary pipes, etc., for water supply, and supply all water required for work and workmen and shall provide temporary latrines and drains.

(7) Clean away all dirt, rubbish, superfluous materials and debris as they accumulate.

(8) Provide arrangements for pumping and baling of water from excavations and foundations wherever and whenever necessary, with his own pumping apparatus including necessary leading drains, slump pits, etc.

(9) Afford facilities to any other parties employed upon the work by the P. W. D., so that their work may proceed during the progress of the contract, and give such persons the use of ordinary scaffolding and ladders.

(10) The contractor is responsible for all accidents to workmen, etc., on the work and he must take precaution against all risk of accidents and if necessary provide for the same by Insurance at the proper time.

Note.—(*b*) It is the business of the contractor to make his own arrangements for quarries and supplies of materials.

23. Only Mysore Teak selected and purchased from Mysore Government Depot should be used.

Abstract estimate for constructing a Travellers' Bungalow at Maddur.

No.	Description of work	Unit	Rate	Quantity	Total
			Rs. a. p.		
1	Earthwork excavating foundations in all soils except hard rock and filling in basement including watering and tamping, etc., complete ..	C.yd.	0 3 0	100	
2	Filling foundations granite stone jelly concrete in lime mortar 1 : 2 : 4	C.ft.	0 4 0	926	
3	Size stone in lime mortar for foundations and basement with through bond stones at 6′ apart in each course including nice dressing for quoins 1½″	,,	0 4 9	2,016	
4	Burnt brick in lime mortar for superstructure including watering for two weeks (mortar 1 : 2½) ..	,,	0 4 0	2,764	
5	Providing and fixing with near joints burnt stone slabs 6″ thick with two line dressing on all exposed portions and one line dressing on other surfaces including fixing with mortar	S.ft.	0 9 0	498	
6	Providing and fixing teakwood panelled doors with frames 3½″×5″ shutters 1½″ thick including butt steel hinges necessary lower bolts, hooks, hasps, staples and handles, approved sizes and patterns and with iron clamps for frames, etc., complete.	,,	1 8 0	328	
7	Providing and fixing teakwood windows with frames 3½″×4½″ shutters 1¼″ thick glazed inside and panelled outside, glasses to be ⅛″ thick and of approved quality with ¾″ diameter iron bars placed at 3″ apart and a centre flat iron bar of 1½″×⅜″ with holes drilled in it and placed horizontally to allow vertical bars to pass through with steel butt hinges, hooks, rings, stoppers and iron clamps for frames, etc., complete shutters in fan halves	Sq. ft.	2 0 0	165	
8	Providing and fixing teakwood glazed ventilators with iron bars ¾″ dia. placed horizontally glasses ⅛″ thick of approved quality shutters 1¼″ thick including rings, ropes, holders, etc., complete ..	,,	1 6 0	9	
9	Providing and fixing perforated reinforced cement concrete ventilator 1½″ thick with 2″×2″ border alround and with one per cent reinforcement as per approved design	,,	1 0 0	30	
10	Providing and fixing teakwood shelves in four compartments with frames 3″×4″ and 1″ panelled shutters including all necessary brass fittings and varnishing, etc., complete	,,	1 6 0	27	
11	Providing and fixing cut stone pillars 9″×9″, 10½ ft. high including base and capital with two line dressing and champhering, etc., complete ..	Each	20 0 0	10	
12	Providing rolled steel girders, Tata's tested to B.S.S. including cost of freight and fixing in cement concrete at ends on walls with one coat of anticorrosive paint and boxing the girders with terrace bricks in cement mortar and tied with galvanized wire netting from above and plastered with nice hand-ground lime mortar, etc., complete	Cwts.	16 0 0	20.1	
13	Providing 4″ thick reinforced cement concrete chajja for varandah in front and rear over windows, etc., including plastering smooth and white-washing, two coats, etc., complete	Sq. ft.	0 10 0	282	
14	Roofing with reinforced brick concrete (R.B.C.) terrace, cement concrete with granite Batani jelly (1 : 2 : 4) and with necessary reinforcements for spans varying from 8′ to 10′ for usual roof loads as per specifications (bullion edge only to be used in all cases) including brick kappi in quick lime minimum thickness 3″ with usual slope for draining of rain water and two courses of flat tiles on top and plastering top and bottom with finely ground mortar and two coats of bitumen emulsion on top and white-washing to ceiling, etc., complete .. The last date of receipt of tender is 6th August 1938 and the earnest money required is Rs. 180.

K. SUBBA RAO,
For *Executive Engineer.*

MISCELLANEOUS DEPARTMENTS

OFFICE OF THE INSPECTOR-GENERAL OF POLICE IN MYSORE, BANGALORE.

Notice No. T. C. 295—37-38, dated 19th November 1937.

The public are hereby informed that an Avery's Weigh-bridge to weigh motor vehicles is erected in the Office of the Inspector-General of Police in Mysore, Cenotaph Road, Bangalore City, and that motor vehicles brought for weighment will be weighed on payment of a fee of Rs. 10 for each weighment. A certificate of weighment will invariably be issued, with each weighment so made.

F. A. HAMILTON,
Inspector-General of Police.
